

# MATHS WORKSHOP

for families of pupils from  
Reception to Year 4

Join us to learn all about how to help support  
your child with early methods of addition.

Book your place on School Spider today!

**THURSDAY  
10TH OCTOBER  
4PM & 5PM**

5+5=10

WHOLE CHURCH OF ENGLAND

## Parent Feedback

Very insightful. Now I finally understand why my children were using number lines!

Brilliant, so helpful, informative and accessible.

This was invaluable.

Thank you for putting everything clearly on the board and the website.

Really Helpful seeing how it can be broken down and what methods we should be teaching at home!

It was really useful to see the methods that you use to teach addition. It will be helpful when helping him learn/do his homework the same way he learns at school.

Very useful. I will take some of the tips for myself. Good to see how it feeds into future maths. Thank you so much.

Thanks, it was an amazing workshop and its very useful for me.

I enjoyed the workshop. Another one on subtraction would be useful.

Great! Please can we have one on subtraction, division and multiplication. I think this will really help. Thank you!

Really helpful.

It was great to know the methods used in the classrooms. I would be grateful if you can do the same for subtraction, multiplication and division. Thank you.

Thank you for this session.

Very useful, thank you. For me, the main difficulty is getting inside th child brain - not just doing it my way and expecting my son to do it. This has really helped to understand why he is doing it the way he is! Thanks.

Great session. Loved the number lines. Thank you!

It was really helpful to support my son in Maths. Many thanks.

Would love any further workshops as feeling rusty after all these years since school!

Helpful to understand the methods used to teach addition so that I can help with homework correctly. And to understand why you are teaching it this way.

Really informative and interesting. Wasn't aware of all the different methods for addition.

Really useful. Great idea for parents. Thank you so much.
